**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 4, 2009 has been entered.

***Response to Amendment***

2. The amendments to the claims filed on November 4, 2009 have been fully considered. The 35 USC 112 1st paragraph rejection is maintained. Applicant is invited to narrow the scope of the claims so that the solvents pertaining to the following step isolation comprises adding to said organic phase a solvent in which atorvastatin calcium is not soluble or is poorly soluble to obtain a precipitate containing atorvastatin which is in amorphous is consistent with that used for the two examples provided in the specification.

3. Notwithstanding the non-allowability of the generic claims, the search and examination was extended. The full scope of claimed processes were searched and examined.

***Allowable Subject Matter***

4. The closest prior art, eg. US 20030149279, teaches the use of cyclohexane. However, the reference does not teach isolation by addition of a solvent in which atorvastatin calcium is not soluble.

***Conclusion***
